Subject: ADOPTAION OF UNIFORM GENERAL EDUCATION COURSES AND ITS CONTENTS FOR ALL BS AND ASSOCIATE PROGRAMS OFFERED AT THE UNIVERSITY AND IN ITS AFFILIATED COLLEGES

Please refer to the subject captioned above.

2. The Syndicate in its 69th (1/2025) meeting held on 17.01.2025, on the recommendations of the Academic Council made in its 22nd (3/2024) meeting held on 30.09.2024 approved the revision of course outline of following general education courses for implementation w.e.f. **Spring Semester 2025** for all BS and Associate Degree programs offered at the University and in its Affiliated Colleges:

- a. Exploring Quantitative Skills (URCG-5120) (Annex-'A')
- b. Tools for Quantitative Reasoning (URCG-5121) (Annex-'B')

3. Further, the Syndicate in its 69th (1/2025) meeting held on 17.01.2025, approved the following recommendations of the Academic Council made in its 23rd (4/2024) meeting held on 05.12.2024 for implementation w.e.f. **Spring Semester 2025**.

- I. Adoption of uniform general education courses component for all BS and Associate degree programs offered at main campus and affiliated colleges (Annex-'C').
- II. Offering structure of general education courses in first four semesters of BS and Associate degree programs offered at main campus and affiliated colleges except for the programs where relevant Accreditation Councils or National Curriculum Revision Committees set the particular requirements (Annex-'D').

4. Furthermore, the Syndicate agreed with the recommendations of Academic Council made in its 23rd (4/2024) meeting held on 05.12.2024 regarding addition of course titled “Pakistan Studies (URCG-5128)” in the list of general education courses mentioned under regulation 6.4 of Undergraduate Semester Regulations 2023 leading to total 32 credit hours instead of 30 for implementation w.e.f. sessions 2023-27 (BS Programs) & 2023-25 (Associate Degree Programs).

5. Further necessary action may kindly be taken accordingly.

Exploring Quantitative Skills

3(3+0)

This is an introductory-level undergraduate course that focuses on the fundamentals related to the quantitative concepts and analysis. The course is designed to familiarize students with the basic concepts of mathematics and statistics and to develop students' abilities to analyze and interpret quantitative information. Through a combination of theoretical concepts and practical exercises, this course will also enable students cultivate their quantitative literacy and problem solving skills while effectively expanding their academic horizon and breadth of knowledge of their specific major / field of study.

Course Learning Outcomes

By the end of this course, students shall have:

1. Fundamental numerical literacy to enable them work with numbers, understand their meaning and present data accurately;
2. Understanding of fundamental mathematical and statistical concepts;
3. Basic ability to interpret data presented in various formats including but not limited to tables, graphs, charts, and equations etc.

Contents*1. Numerical Literacy:*

- i. Numbers system and basic arithmetic operations;
- ii. Units and their conversions, dimensions, area, perimeter and volume;
- iii. Rates, ratios, proportions and percentages;
- iv. Types and sources of data;
- v. Measurement, scales;
- vi. Tabular and graphical presentation of data;
- vii. Quantitative reasoning exercises using number knowledge.

2. Fundamental mathematical concepts:

- i. Basics of geometry (lines, angles, circles, polygons etc.);
- ii. Sets and their operations;
- iii. Relations, functions, and their graphs;
- iv. Exponents, factoring and simplifying algebraic expressions;
- v. Algebraic and graphical solutions of linear and quadratic equations and inequalities;
- vi. Quantitative reasoning exercises using fundamental mathematical concepts.

3. Fundamental Statistical Concepts:

- i. Population and sample;
- ii. Measures of central tendency, dispersion and data interpretation;
- iii. Rules of counting (multiplicative, permutation and combination);
- iv. Basic probability theory;
- v. Introduction to random variables and their probability distributions;
- vi. Quantitative reasoning exercises using fundamental statistical concepts.

Tools for Quantitative Reasoning

3(3+0)

This is a sequential undergraduate course that focuses on logical reasoning supported with mathematical and statistical concepts and modeling / analysis techniques to equip students with analytical skills and critical thinking abilities necessary to navigate the complexities of the modern world. The course is designed to familiarize students with the quantitative concepts and techniques required to interpret and analyze numerical data and to inculcate ability in students the logical reasoning to construct and evaluate arguments, identify fallacies, and think systematically. Keeping the pre-requisite course of Quantitative reasoning (I) as its base, this course will enable students further their quantitative, Logical and critical reasoning abilities to complement their specific major field of study.

Course Learning Outcomes

By the end of the course, student shall have:

1. Understanding of logic and logical reasoning;
2. Understanding the basic quantitative Modeling and Analyses.
3. Logical reasoning skills and abilities to apply them to solve quantitative problems and evaluate arguments;
4. Ability to critically evaluate quantitative information to make evidence based decisions through appropriate computational tools.

Contents

1. Logic, Logical and Critical Reasoning:

- i. Introduction and importance of logic,
- ii. Introductive, deductive and abductive approaches of reasoning,
- iii. Propositions, arguments (valid; invalid), logical connectives, truth tables and propositional equivalences,
- iv. Logical fallacies,
- v. Venn Diagrams,
- vi. Predicates and quantifiers,
- vii. Quantitative reasoning exercises using logical reasoning concepts and techniques.

2. Mathematical Modeling and Analyses:

- i. Introduction to deterministic models,
- ii. Use of linear function for modeling in real-world situations,
- iii. Modeling with the system of linear equation and their solutions,
- iv. Elementary introduction to derivatives in mathematical modeling,
- v. Linear and exponential growth and decay models,
- vi. Quantitative reasoning exercises using mathematical modeling.

3. Statistical Modeling and Analyses:

- i. Introduction to probabilistic models,
- ii. Bivariate analysis, scatter plots,
- iii. Simple linear regression model and correlation analysis,
- iv. Basics of estimation and confidence interval,
- v. Testing of hypothesis (z-test; t-test),
- vi. Statistical inference in decision making,
- vii. Quantitative reasoning exercise using statistical modeling.

Fables, Wisdom Literature, and Epic

2(2-0)

The course will enable students to explore human experiences, cultivate an appreciation of the past, enrich their capacity to participate in the life of their times, and enable an engagement with other cultures and civilizations, both ancient and modern. But independently of any specific application, the study of these subjects teaches understanding and delight in the highest achievements of humanity. The three components of the course, including fables, wisdom literature and epic, will enable the learners to explore and understand the classic tradition in literature. Development of personal virtue, a deep Sufi ethic and an unwavering concern for the permanent over the fleeting and the ephemeral are some of the key themes explored in the contents that will develop an intimate connection between literature and life.

Contents

Architectural structures host the most mundane and ordinary activities as well as elaborate ceremonies to honor religious sentiments or to propitiate political deities. Some structures built for one purpose sometimes end up serving the other in subsequent times. The purpose of this course is to familiarize the learners with the concepts of reading a building to understand human life that existed in and around it during certain historical moments of its existence. Some of the approaches to study a monument could be the socio-cultural, religious, economic, and political situations of the area where it stands. These angles will not only acquaint you with the different phases of the monument's life but also with the people who commissioned it, occupied or altered it, or tried to destroy it.

Contents

1. Learning to engage with a building
Case Study: Mughal-period mosque, the Begum Shahi/Maryam Zamani
2. Reading a building: History, decorative techniques, location, symbolic significance of motifs, plan/layout
3. Bays and isles, arches, minarets and domes
4. Muqarnas
5. Traditional decorative techniques: munabbat-kārī, parchīn-kārī, kāsha- kārī, āyina- kārī, tāza-kārī
6. Wet-plaster painting known as fresco-buono and dry-plaster painting or fresco-secco
Geometric patterns, Islīmī or arabesque (stylized vegetal designs) and naturalistic vegetal designs for decorative purposes
7. Project: Working on historical and anecdotal material of a selected monument

Course Description:

This course will introduce students with the subject matter of social science, its scope, nature and ways of looking at social phenomenon. It will make the participants acquaintance with the foundations of modern society, state, law, knowledge and selfhood. While retaining a focus on Pakistani state and society, students will encounter theoretical concepts and methods from numerous social science disciplines, including sociology, politics, economics anthropology and psychology and make them learn to think theoretically by drawing on examples and case studies from our own social context. Students will be introduced to the works of prominent social theorists from both western and non-western contexts. Instruction will include the use of written texts, audio-visual aids and field visits.

Learning Outcomes:

The course has following outcomes:

It will

- Introduce student with the nature of human social behavior and foundations of human group life
- Analyze the reciprocal relationship between individuals and society.
- Make student aware with the nature of societies existing in modern world
- Make students familiar with the philosophy of knowledge of social sciences
- Introduce students with the works of prominent theories explain human group behavior
- Help students to understand the foundations of society including culture, socialization, politics and economy
- Introduce students with various dimensions of social inequalities with reference to gender, race, ethnicity and religion
- Make them aware about the understanding of various themes pertains to social science in local context
- Help them recognize the difference between objective identification of empirical facts, and subjective formulation of opinionated arguments

Course Outlines:

1. Introduction to Social Sciences

- Social world, Human Social behavior, Foundations of society
- Evolution of Social sciences
- Philosophy of Science
- Scope and nature of social sciences

Course Description:

This course extends our study of modern societies, their structures, their institution and their functions in global era. It will introduce the participants with processes of social change in Pakistan from the time of formal independence to the present day. It will enhance our understanding of the evolution of Pakistani culture, society and its social institutions including role of religion in society/polity, democracy, urbanization and individuation, ending with important questions and challenges facing by Pakistan in the twenty first century. From a social science perspective participants will learn analytically about the issues and challenges faced by states and societies of today's world with special focus on local context.

Learning Outcomes:

The course has following outcomes:

It will:

- Cultivate critical thinking, the ability to ask questions, engage in reasoned debate and tolerance of opposing points of view
- Introduce student with modern day social organization, institutions, groups and group identities
- Make student aware with the concept of growth and development and endogenous and exogenous factors of development
- Make students familiar with religious and political institution of our society from a sociological perspective
- Introduce students with the socio-economic prospects and challenges faced by Pakistan as a developing and transforming state
- Help students to understand the implications of modernity including digital/technological revolution, global warming, income inequality, global terrorism and polarization
- Develop an in-depth and critical understanding of the socio-economic problems faced by Pakistan

Course Outlines:

1. Groups, Organizations and Bureaucracies

 University of Sargodha

The course aims at providing understanding of a writer's goal of writing (i.e. clear, organized and effective content) and to use that understanding and awareness for academic reading and writing. The objectives of the course are to make the students acquire and master the grammatical academic writing skills. The course would enable the students to develop argumentative writing techniques. The students would be able to logically add specific details on the topics such as facts, examples and statistical or numerical values. The course will also provide insight to convey the knowledge and ideas in an objective and persuasive manner. Furthermore, the course will also enhance the students' understanding of ethical considerations in writing academic assignments and topics including citation, plagiarism, formatting and referencing the sources as well as the technical aspects involved in referencing.

اخلاق حسنہ : اخلاق (تعارف، ضرورت و ایمیت، اقسام، معنویت)

- برائی کو نیکی سے مٹانا
- نیکی کے کاموں میں مسابقت
- لوگوں کے درمیان صلح
- عدل و انصاف
- سچائی
- ایثار
- سلیم قلب
- مہمان نوازی
- لغویات سے اعراض
- عاجزی و انکساری
- نگاہ اور اواز کو پست رکھنا
- جال میں میانہ روی
- شرسگابوں کی حفاظت
- صبر
- شکر
- امور میں میانہ روی

اخلاق سنبھلی :

- ظلم اور زیادتی
- غرور و تکبر
- نفسانی خواہشات کی پیروی
- بدگمانی
- جھوٹ
- چغلی اور تہمت
- تمسخر اور شیخی خوری
- لہو و لعب
- بڑے ناموں سے پکارنا
- احسان جتنا اور تکلیف دینا
- فضول خرچی اور حد سے بڑھنا
- حسد اور تنگ دل
- بس پردگی

Exploring Quantitative Skills

3(3+0)

46
1-9-18

This is an introductory-level undergraduate course that focuses on the fundamentals related to the quantitative concepts and analysis. The course is designed to familiarize students with the basic concepts of mathematics and statistics and to develop students' abilities to analyze and interpret quantitative information. Through a combination of theoretical concepts and practical exercises, this course will also enable students cultivate their quantitative literacy and problem solving skills while effectively expanding their academic horizon and breadth of knowledge of their specific major / field of study.

Course Learning Outcomes

By the end of this course, students shall have:

1. Fundamental numerical literacy to enable them work with numbers, understand their meaning and present data accurately;
2. Understanding of fundamental mathematical and statistical concepts;
3. Basic ability to interpret data presented in various formats including but not limited to tables, graphs, charts, and equations etc.

Contents

1. Numerical Literacy:

- i. Numbers system and basic arithmetic operations;
- ii. Units and their conversions, dimensions, area, perimeter and volume;
- iii. Rates, ratios, proportions and percentages;
- iv. Types and sources of data;
- v. Measurement; scales;
- vi. Tabular and graphical presentation of data;
- vii. Quantitative reasoning exercises using number knowledge.

2. Fundamental mathematical concepts:

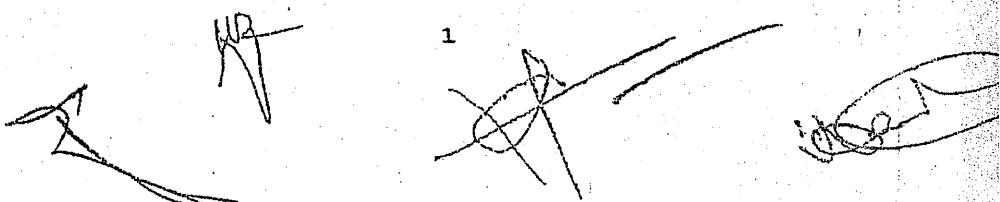

- i. Basics of geometry (lines, angles, circles, polygons etc.);
- ii. Sets and their operations;
- iii. Relations, functions, and their graphs;
- iv. Exponents, factoring and simplifying algebraic expressions;
- v. Algebraic and graphical solutions of linear and quadratic equations and inequalities;
- vi. Quantitative reasoning exercises using fundamental mathematical concepts.

3. Fundamental Statistical Concepts:

- i. Population and sample;
- ii. Measures of central tendency, dispersion and data interpretation;
- iii. Rules of counting (multiplicative, permutation and combination);
- iv. Basic probability theory;
- v. Introduction to random variables and their probability distributions;
- vi. Quantitative reasoning exercises using fundamental statistical concepts.

This is a sequential undergraduate course that focuses on logical reasoning supported with mathematical and statistical concepts and modeling / analysis techniques to equip students with analytical skills and critical thinking abilities necessary to navigate the complexities of the modern world. The course is designed to familiarize students with the quantitative concepts and techniques required to interpret and analyze numerical data and to inculcate ability in students the logical reasoning to construct and evaluate arguments, identify fallacies, and think systematically. Keeping the pre-requisite course of Quantitative reasoning (I) as its base, this course will enable students further their quantitative, Logical and critical reasoning abilities to complement their specific major field of study.

Course Learning Outcomes

By the end of the course, student shall have:

1. Understanding of logic and logical reasoning;
2. Understanding the basic quantitative Modeling and Analyses.
3. Logical reasoning skills and abilities to apply them to solve quantitative problems and evaluate arguments;
4. Ability to critically evaluate quantitative information to make evidence based decisions through appropriate computational tools.

Contents

1. Logic, Logical and Critical Reasoning:

- i. Introduction and importance of logic,
- ii. Introductive, deductive and abductive approaches of reasoning,
- iii. Propositions, arguments (valid; invalid), logical connectives, truth tables and propositional equivalences,
- iv. Logical fallacies,
- v. Venn Diagrams,
- vi. Predicates and quantifiers,
- vii. Quantitative reasoning exercises using logical reasoning concepts and techniques.

2 Mathematical Modeling and Analyses:

- i. Introduction to deterministic models,
- ii. Use of linear function for modeling in real-world situations,
- iii. Modeling with the system of linear equation and their solutions,
- iv. Elementary introduction to derivatives in mathematical modeling,
- v. Linear and exponential growth and decay models,
- vi. Quantitative reasoning exercises using mathematical modeling.

3 Statistical Modeling and Analyses:

- i. Introduction to probabilistic models,
- ii. Bivariate analysis, scatter plots,
- iii. Simple linear regression model and correlation analysis,
- iv. Basics of estimation and confidence interval,
- v. Testing of hypothesis (z-test; t-test),
- vi. Statistical inference in decision making,
- vii. Quantitative reasoning exercise using statistical modeling.

Course Description

This course is designed to provide students with a comprehensive exploration of Pakistan's identity, spanning geographical, historical and cultural dimensions. It delves into the diverse landscape, ancient civilizations, and rich cultural heritage that define Pakistan. Moreover, it examines the socio-cultural and political transformations in Pakistan over time including democratic transitions and military interventions. The aim of this course is to inculcate in students a nuanced understanding of Pakistan's past, present, and potential future trajectories, enabling them to critically evaluate the complex dynamics shaping the nation's development.

Course Learning Outcomes

By the end of this course, student will be able to:

1. Have enhanced knowledge of the geographical, historical and political aspects of Pakistan.
2. Understand the society and cultural of Pakistan.
3. Understand and explain the socio-economics developments in Pakistan.
4. Explore contemporary issues and challenges faced by Pakistan and their implications for the future.

Contents

1. **Introduction to Pakistan:**
 - Geographical location and significance.
 - Historical background: Ancient civilizations in the region.
 - Factors leading to the creation of Pakistan
2. **Political History of Pakistan:**
 - Formative phase
 - Military interventions and democratic transitions.
3. **Geography of Pakistan:**
 - Physiography: Mountains, plains, plateaus, deserts, valleys and coastal areas.
 - River system: Indus river and its tributaries;
 - Climatic regions of Pakistan.
4. **Society and Culture of Pakistan:**
 - Socio- cultural diversity.
 - Language and literature of Pakistan.
5. **Economics Development of Pakistan:**
 - Agriculture and industrial sectors of Pakistan.
 - Economic challenges of Pakistan.
6. **Contemporary Issues:**
 - Foreign relations of Pakistan.
 - Security challenges: terrorism, extremism, regional conflicts.
 - Environmental problems and sustainable development (SDGs).
 - Media and social change.
